Installing Safe Exam Browser

Below is our step-by-step guide on how to install Safe Exam Browser on both Windows/macOS operating systems.

This platform will be required for learners to take their Reformed Functional Skills exams.

The Download

To download Safe Exam Browser, open the below link:

- https://safeexambrowser.org/download_en.html

Select the download option relevant to your Operating System.

Below are screenshots showing the Windows and MAC download buttons.

Windows

Current version of Safe Exam Browser for Windows 7, 8.1 and 10
SHA1: 02b5a4865960add45f4839bdbca9f1120c4343d99

[Download from GitHub project site.](#)

macOS

Current version of Safe Exam Browser for macOS 10.13, 10.12, 10.11
Build 29E7. SHA1: 1e1ba490d4720a05efe2ad3a1e0c88bbdb08808

[Download from new GitHub project site.](#)

Selecting either of the above will trigger a download on your internet browser, this may open in a new tab.

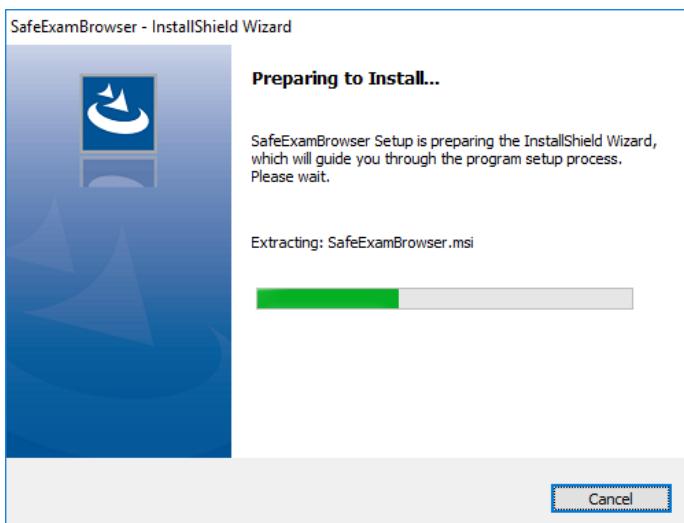

Choose to run the download.

Please note: You may be required to enter an administrative password to complete the installation. Please contact your IT team for further support with this.

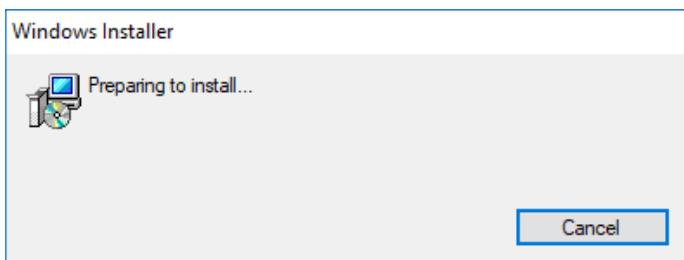

Please note: You may be asked if you are happy for the software to make changes to your machine. If you are unsure about the answer to this, please contact your IT support.

The Installation - Windows

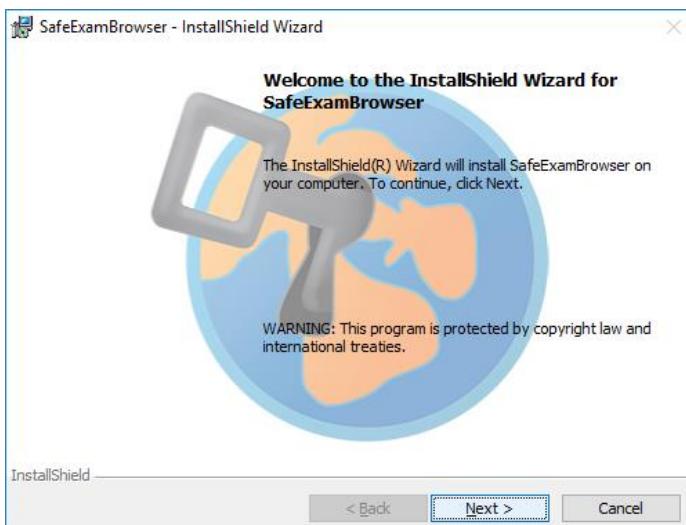

Running the download will start the InstallShieldWizard which confirms Safe Exam Browser is preparing to install...

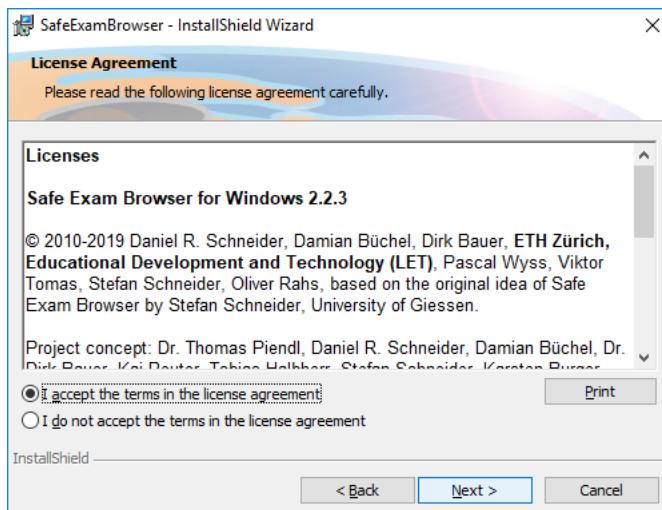

...swiftly followed by the Windows Installer installation.

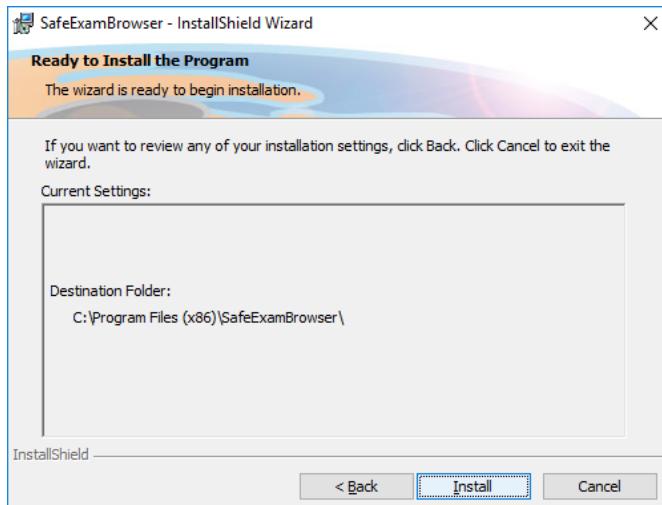

Select "Next" on the welcome page...

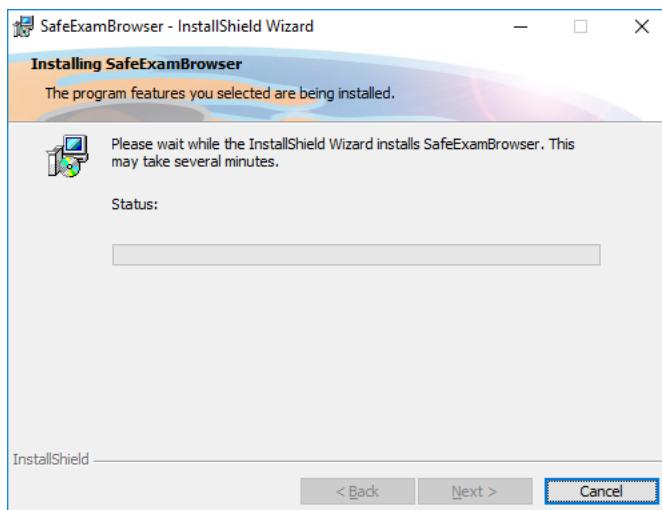

...choose to accept the terms in the license agreement...

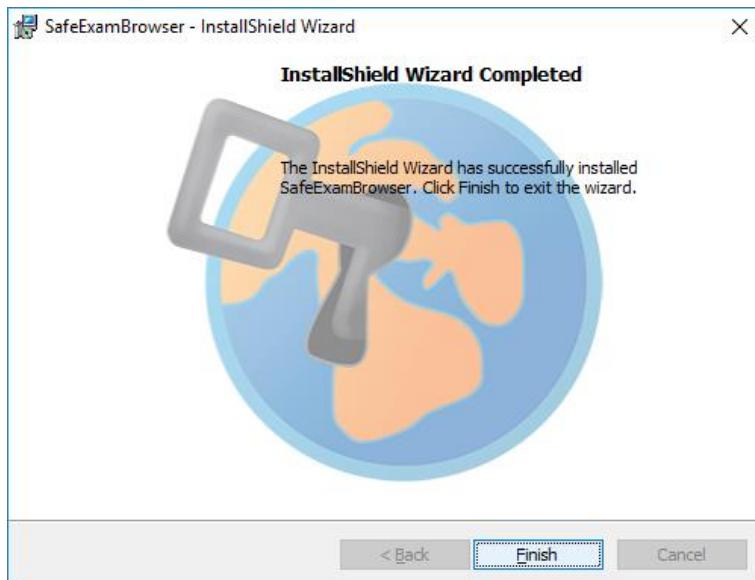

...and select "Install".

Wait for the installation process to complete.

Select “Finish”. You have now installed Safe Exam Brower.

The Installation – macOS

After selecting ‘run’ on your macOS system, all you will have to do to install Safe Exam Brower is drag the ‘Safe Exam Brower’ icon into the ‘Applications’ folder in the pop up box that will appear (shows below).

Safe Exam Brower will now be installed to your machine. You can open this by going to your ‘Applications’ folder and double clicking on the Safe Exam Brower icon.

You may receive the below message when opening Safe Exam Brower, simply click on ‘Open’ to proceed.
